## REPORT OF THE BOARD OF EDUCATION.

---

### TOWN DISTRICT.

Comparing the present condition of our schools with the past, we believe that advancement has been made and the indications are encouraging for the future. But we must attest our conviction that the standard is too low, that as a people we are too indifferent to the moral and intellectual development of the rising generation. Much is expected of the board of education, yet there remains with the individual a responsibility which is perhaps too little appreciated. The town has been wise and liberal in its appropriations for the support of schools and we trust that this spirit of munificence will continue, which supplemented by the hearty co-operation of parents and citizens, will enable us to make effectual every instrumentality for the advancement of the educational interests of the town.

Standing at the close of the school year and looking backward over the work, we find that the schools for the most part have been quietly and faithfully moving in the line of duty. The interest in school work has increased, the order has been more uniformly good, teachers, parents and scholars have wrought harmoniously together in this great cause, and the re-

sult has been of a more healthy and judicious character. A few exceptions to this general prosperity constitute the chief source of annoyance and regret to the school board.

It is the aim of your school board to elevate the standard of our schools. To do so there are certain essentials, among which are good teachers, good books, and a unity of effort. The parents should co-operate with the board and teachers, that they may raise the standard and make the schools more useful. The only education the majority of our children will receive will be that of the common school, and we cannot make this institution too thorough.

There is this fact that no careful and thinking observer can fail to notice :—That children are the exact exponents of their parents in regard to the feelings of either kindness or unkindness, which they cherish towards those under whose care they are placed. That teacher has but little knowledge of human nature who has not the ability to to read at once from the countenances and acts of her pupils in what estimation she is held by their parents. Children are incompetent to judge of the merits or demerits of those who instruct them, and no parent who acts wisely and prudently will base his judgment in relation to the fitness or unfitness of the instructor for her work, on the mere caprice or evidence of children. Who would be willing to have the merits of his labor judged and reported to the community on the authority and knowledge of school children? Would it not be better for you to go to the school room yourselves, not once but often, and see for yourselves, and then you will be the better prepared to judge correctly whether they are faithful in the interests of your children?

The discretionary power given under the law establishing the town system has been exercised to some extent. In several of the divisions the pupils have been schooled in the adjoining divisions to a greater extent the past year than in any previous year. Owing to this fact it will be seen again that we get more schooling for our money than formerly under the district system.

We should cherish and approve that provision in the law whereby every pupil may have the same advantages in acquir-

ing an education, whereas under the old law, though parents might contribute largely to help pay the public expenses, their children did not have the same privileges as other children on account of living in a less wealthy district.

We invite the careful consideration of every legal voter to the report of the school board where can be seen by figures and proved to every one that all the scholars in the district have had the benefit of thirty weeks of schooling, at a saving of six hundred dollars from what it would have cost under the old district system for the same number of weeks. That speaks a good word for the new school law. That some have not availed themselves of the opportunity to send their children to school thirty weeks instead of twenty, as under the old system, is not the fault of the law or of the school board.

On the 12th day of March the legal voters of the town district will meet and cast thier votes in favor of or in oposition to this town system. This is an important question and we ask every parent and citizen to give it careful and impartial thought. Will we go back to the old; narrow, contracted district system, or will we stand by the present town system, and by combined efforts give the children of the town twice the number of weeks' schooling for the same amount of money?

We would call your attention to the subject of free text books. That it has been very beneficial and greatly promoted the cause of education we sincerely believe. Classification is of prime importance. With free text books each school is of the same general character. Discarded books of one school can be used in some other, thereby keeping all books in use.

Your school board will mention two things that are very desirable for the best progress of our schools:— A school globe. It costs but little, and is invaluable for the beginner in Geography in giving him a visible idea of the shape of the earth, the lay of the land and water, and with the teacher's explanation, its position as a moving ball in the universe. By this a fog is dispelled in a few minutes from the beginner's mind through which it would blindly grope for weeks without this aid:— An unabridged dictioary for reference. The school is the place for critical reading. Scholars criticise each other and the

teacher, the scholars. A good dictionary is very often necessary to decide cases and for information, besides, the word, being investigated while the interest is up, will be better understood afterwards.

One thought more and we are done. Co-operation is the word. The town district may spend money freely, as it has done, in furnishing school houses and keeping them in repair and may secure the best of teachers, yet if the parents are not united in their efforts for a good school they will not have it.

ALDEN P. FARRAR,  
EDGAR HAZEN,  
JOHN W. JACKMAN,  
*School Board.*

## REPORT OF THE BOARD OF EDUCATION.

---

### OF THE SPECIAL SCHOOL DISTRICT HILLSBOROUGH BRIDGE.

---

In submitting the report of our schools we are again and for the third time compelled to chronicle the sad loss by death of another teacher. Miss Marion Moore had for five years taught the intermediate department and been unanimously re-elected for another, although the School Board with other friends were

aware that her health was failing, but with true love and devotion for her work she desired to retain her position, hoping that the summer's rest would restore her health and vigor sufficiently to resume her work in the fall—a hope earnestly shared by the School Board and her many other friends, but all were doomed to disappointment, for though for a time she seemed greatly benefited by the change of scenery and mountain air, whither she had gone during the vacation, shortly before the commencement of the fall term she was obliged to request that a substitute be engaged for at least the fall term. Her health continuing to fail, on the 5th of Nov. last, she unconditionally resigned her position. The unfavorable progress of the disease still unchecked she failed rapidly and passed quietly away on the 17th of January, 1891, expressing her joy and gladness that her last work had been in the school room for the benefit of those she loved so well. That Miss Moore was a faithful teacher, devoting heart and mind to her work, the progress, love and respect of her pupils bear testimony in the strongest manner. A legacy of \$1,000 she bequeathed to the district for the benefit of the high school showed her unselfish interest and desire to advance the cause of education. Her example, so worthy of imitation, will, we trust, be followed by others more able even if less interested.

The progress in the several departments has in general been quite satisfactory and at present the efforts of the teachers to do good work is being met with commendable zeal by the pupils.

Mr. Isaac Copp is Principal, through whose efforts, seconded by the high school pupils, a good amount of chemical apparatus has been obtained without cost to the district. Miss Ada Buxton is teaching her sixth year in the Grammar, Miss Gertrude Manahan her first in the Intermediate and Miss Cora Peaslee her third in the Primary department. Further information will be found in the statistical table and Treasurer's report.

M. H. FELT,

*For the Board of Education.*

## REPORT OF THE TREASURER.

The Treasurer of the Board of Education respectfully submits the following report for the year ending Feb. 25, 1891:

Mar. 1.	Balance in hands of Treasurer,	\$177 59
